

Word Inventory. Sexy or not.

Our perception of a word or a phrase can change based on *context*. Words/phrases can create different feelings and reactions based on the timing, location and our mindset in which the word is used. Some words may feel a little off putting or even vulgar in one context, yet in a sexual or aroused context the same word or phrase can be a turn on and appealing when heard, said or even thought of.

Below is a list of some words and phrases that you may or may not perceive as sexy words. take some time on your own and review the list, placing a check mark next to the words that you perceive as sexy and hot, if the context was that you were in a sexy and turned-on mood.

Then, go back through the list of words that you selected and indicate the words, that if heard or said outside of a sexy, turned-on mindset you would not find sexy to say, hear, or think about.

Example, for some people the word “cum” sounds very hot and sexy when they are in a sexual and/or aroused mood. The word “cum” would then receive a check mark next to it. However, that same word may feel disrespectful or crude if the word was used in a different context or setting, such as not feeling sexually turned on at the time. In which case the word “cum”, that has a check mark next to it will now also receive a line drawn through it, indicating that outside of a sexual context the word “cum” is not of interest and perhaps would even seem offensive.

Once you individually have gone through the list and checked marked and crossed through the words of your choice, compare your list with your partner’s list. This is a great opportunity to discover some words that you did not know were a turn on for your partner and vice versa.

Allow this exercise to be a bridge to expand each other’s sexual vocabulary and to have some fun!

*Feel free to include additional words to your list. Space is provided at the end of the list.
